TERMO	•	•	-	•	•	-	•	-	•	-	•	-	•	•	•	-	-

Technical parameters

Semi-rigid flexible hose made of Al foil, folding with extremely strong „Triplock“ multiple lock.

- for mechanical ventilation and climate control ducts
- for smoke and dust extraction
- Highly mechanically resistant
- STANDARD, PROFI – supplied in lengths of 3 or 5 m compressed to 1/3 of the length (type STANDARD DN 80–250 to 1/5), by pulling both ends the duct is stretched

- SONO, TERMO – supplied stretched in 1 m length or by agreement (this range only on request)
- hoses are not suitable for chimney liners and flue gas extraction
- operating temperature -25 °C to +200 °C
- max. air velocity in the pipe 25 m/s
- max. operating pressure 2 000 Pa
- pressure drops see graph

Variants:

- SEMIFLEX STANDARD thickness 0.08 mm
- SEMIFLEX PROFI thickness 0.12 mm
- SEMIFLEX SONO soundproofed mineral wool layer 25 mm, thickness 0.12 mm
- SEMIFLEX TERMO thermally insulated mineral wool layer 25 mm, thickness 0.12 mm

Additional illustrations**Equivalent length**

$$Z = \frac{D}{300} \quad Z = \text{Equivalent length (m)}$$

$$Q = \text{Coefficient for bending loss}$$

$$D = \text{Pipe diameter (mm)}$$

Example

$$\text{Air velocity} = 5 \text{ m/s} \quad 90^\circ\text{bend} = 1 \text{ piece}$$

$$\text{Pipe diameter} = 203 \text{ mm} \quad \text{Pipe length} = 4 \text{ m}$$

73

Pressure loss = ?

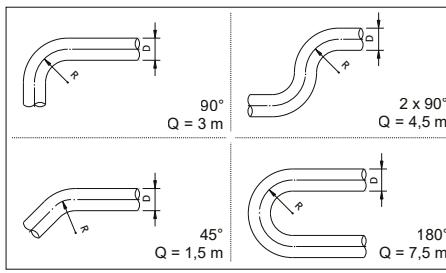

$$\text{Pressure drop per 1 m of pipe} = 3.12 \text{ Pa (see graph)}$$

$$\text{Coefficient for bending loss} = 3 \text{ m (see table)}$$

$$\text{Equivalent length} = 3 \times \frac{200}{300} = 2.0 \text{ m}$$

$$\text{Pressure loss} = (2.0 + 4 \text{ m}) \times 3.12 \text{ Pa/m}$$

$$= 18.72 \text{ Pa}$$
